Part 3 - Read the passage and answer the questions. (4 points)

It is estimated that about 200 million people use the Internet computer network around the world. The Internet allows people to work at home instead of traveling to work. The Internet allows businesses to communicate with customers and workers in any part of the world for the cost of a local telephone call. E-mail allows users to send documents, pictures and other data from one part of the world to another in at least 5 minutes. People can use the Internet to do shopping. This saves a lot of time. It is possible to use the Internet for education - students may connect with their teachers from home to send or receive e-mail or talk about their problems through "on-line" rather than attend a class.

- Question 25.** How many people use the Internet computer network around the world?
Question 26. Do people have to travel to work instead of working at home?
Question 27. How can people send documents, pictures, and other data from one part of the world to another?
Question 28. What can students use the Internet for?
